1988 351W MARINE - FordWindsor

The 351 falls within three engine designations, the W, the C and the M. The engines feature the same displacement but share little else in common. For this reason, it is imperative that the torque specifications for one engine not be used for a different engine designation. Also note that some torque specifications vary by the year of the engine.

The 351W nodular-iron crankshaft has larger main and rod journals than the 289/302, along with a longer stroke. With this crank came longer connecting rods (5.956 inches) than you find inside the 289/302. New for 1969 was the only 351W-4V engine ever produced with 10.7:1 compression ratio.

Ford Small-Block Engine Parts Interchange Specifications

which oil weight to use on 89 PCM 351 engine? I have no sticker on my engine or boat to tell me what weight is recommended. Seems I've got some oil coming from under the valve covers onto both my exhaust manifolds .. smokes after warming up. I was thinking I've got the wrong oil in there maybe. It's got Mobile 1 synthetic 10w-30 in it now.

which oil weight to use on 89 PCM 351 engine?

Planning on building a mildly beefed, free breathing, easy rolling (balanced) 351w for my inboard/outboard 20 ft deep V runabout. Any comments regarding the intake manifold and carb would be appreciated. I notice newer 5.7' marine's are rated at about 5000 rpm so that is probably the practical limit for a marine motor.
