## **Action Theory - Exploring ...**

Goffman (1963) defined stigma as 'an attribute that is deeply discrediting within a particular interaction'. In other words, it is an undesirable characteristic in a particular context – for example, cohabitation before marriage was greatly frowned upon in England during the first part of the 19<sup>th</sup> century, but

# File Type PDF Goffman S Theory Of Stigmatisation And Labelling

today is considered normal and is even encouraged.

## **Section 5. Stigma and how to tackle it | Health Knowledge**

In Goffman's theory of stigma he distinguishes three categories; "the own", "the wise" and "the normal" (Goffman 1963). He describes "the own"

# File Type PDF Goffman S Theory Of Stigmatisation And Labelling

as a group that represent stigmatized society. “the wise” in Goffman term are people who assign stigma and feels that life is better to them with few complains.

# File Type PDF Goffman S Theory Of Stigmatisation And Labelling

Stigma and labelling theory The practical relevance of the sociological construct of 'labelling' has been acknowledged within medical practice since the 1960s.

Labelling theory draws attention to the view that the experience of having an illness has both social as well as physical consequences for an individual.
