Heathkit Assembly and Operation Manual SB-610 Monitor ...
The SB-610 is a display to monitor "on the air" signals. The manual notes that the unit can be used from 160 to 6 meters without tuning or modification. Its primary purpose is monitoring the transmitted signal pattern; the RF envelope, RF trapezoid, or RTTY cross pattern.

Refurbishing the Heathkit SB-610 and The 610C-2 | Home of ...
Refurbishing the Heathkit SB-610 and The 610C-2 Makeover – Spring 2012 The Heathkit SB-610 Monitor Scope, although not as popular today as it was 20 years ago, is relatively inexpensive and available through Hamfests and Web-based auction sites.Not only can it check transmitter signal characteristics but also monitor signals from other stations when used in conjunction with a receiver.

Generally, I have seen the SB-610 used for transmit monitoring (station monitor scope) and the SB-620 for receiver operation (panadapter/scan analyzer/spectrum scope). Page 33 and 34 of the SB-610 manual covers hookup to last IF stage (receiver). <http://www.railroad-signaling.com/heathkit/docs/SB610.pdf>
