Women Who Launched The Computer

Women Who Launched the Computer Age is about human computers. Female mathematicians who worked for the Army programming ENIAC were called computers. The Army hired them to calculate where bombs should land and that was called setting weapons a/k/a pinpointing where the missile would land where they would do the most damage.

Women Who Launched the Computer Age by Laurie Calkhoven

In 1946, six brilliant young women programmed the first all-electronic, programmable computer, the ENIAC, part of a secret World War II project. They learned to program without any programming languages or tools, and by the time they were finished, the ENIAC could run a complicated calculus equation in seconds.
